

# Dream Awake

Words by Stella Ager. Music by [Litmus A Freeman](#) & Cliff Coates

**E**                    **G**                    **D**                    **A**  
Your eyes are greener than the sea,    And like the sea reflect me  
**F**                    **C**                    **G**                    **B7**  
I don't care mine aren't quite blue,    Because I know they reflect

**E**                    **G**                    **D**                    **A**  
you, it's like we never have to speak,    it always seems so easy  
**F**                    **C**                    **G**                    **B7**  
I'm looking upwards just to see    You looking down and into

**F#m**            /                    **A**                    /                    **B7**                    /  
me before,                    be - hind a crystal door,    looking back to turn around, the  
**F#m**            /                    **A**                    /                    **B7**                    /  
other side is solid ground,                    you take my hand                    to understand  
**E**                    **E7**                    **E**                    **E9**  
It's more than just a kiss,    I never felt a - wake like this

**E**                    **G**                    **D**                    **A**  
And when we dream                    We dream a - wake  
**E**                    **G**                    **D**                    **A**  
Your the chance                    I've got to take

**E**                    **G**                    **D**                    **A**  
Every word's been said before,                    every thought unspoken  
**F**                    **C**                    **G**                    **B7**  
A spark blew through a bolted door                    And now I know I've woken

**E**                    **G**                    **D**                    **A**  
it's like we never have to speak,    it always seems so easy  
**F**                    **C**                    **G**                    **B7**  
I'm looking upwards just to see    You looking down and into

**E**                    **G**                    **D**                    **A**  
me I'm living in                    A dream a - wake  
**E**                    **G**                    **D**                    **A**  
Your the chance                    and you are mine to take                    **Repeat**

**E**                    **G**                    **D**                    **A**  
Dream Awake  
**E**                    **G**                    **D**                    **A**  
Dream Awake  
**A7**                    /                    **E7#9**  
Dream Awake
