

Everywhere I Go

Litmus A Freeman

Ever since we met I've been searching for
Ways to see you more
And maybe steal a kiss, if it felt right
Make it last all night

Are you leading me on, just singing a song
Or do you feel the words
This vision in my mind is leading me astray
Every minute of the day

Chorus 1:

I can see your face Everywhere I Go
Do you have a place for me let me know

I'm trying not to search for a sweet release
Just to keep the peace
To free the knot inside will take a little more
Than I got before

Will you reveal, just how you feel
Or keep it locked away?
This vision in my mind, is leading me astray
Every minute of the day

Chorus 2:

I can see your face Everywhere I Go
Do you have a place for me let me know
I can hear your name Everywhere I Go
Do you feel the same? I've just got to know

Instrumental

Repeat Chorus 2
