# Four Teeth

Litmus A Freeman

```
E                      F#(open)
        There's a      hole in my
head,   where the      words come out
                and it sometimes digs a
hole    for     it -   self

Bm                     A                 Em              /      F#m
        No matter how  hard I try      I   find
Bm                     A                 G          F#m
     I'm wishing that  I'd said something   else    to    You,
```

**Chorus 1:**
```
D                      A                 Em        G    A
        So don't always take me at my    word
  Cause sometimes I'm  talking to my      past, and I've  only   got four
Bm                     /
teeth

E                      F#(open)
        I could say what you
want   me    to    say
       if    I     knew what it
was    at    the   time

Bm                     A                 Em              /      F#m
        But I'm just a normal guy you    know
Bm                     A                 G          F#m
        Trying too    hard    to    be   anything    but
```

**Chorus 2:**
```
D                      A                 Em        G    A
        So don't always take me at my    word
  Cause sometimes I'm  talking to my      past,
        So don't always take me at my    word
  Cause sometimes I'm  talking to my      past, and I've  only   got four
Bm                     /
teeth

Instrumental:          [ E            | F#(open)      ]  x  4

Repeat 2nd Chorus

[Bm            Em    F#m    ]
[teeth         /     /      ]     x  3
[      I've  only   got four]

        G              F#         Bm
I've    only           got    four  teeth
```
