

Going Around In Circles

[Litmus A Freeman](#)

Once there was nothing
Then there was something
Something from nothing
'Cause everything comes from nothing at all

We're all going somewhere
Somewhere or nowhere
We just don't know where
So just enjoy the ride

We think we're on the way to some special destination
But see it's all about 'The Trip', enjoy a life of liberation

We're going around in circles
Spinning natural cycles
We're going around in circles
So flow in nature's cycles
And just dance, dance, dance

Now it comes, then it goes
But where we come from no one knows
Without attachment it all flows
'Cause we control nothing at all

Through the darkness comes the light
Then from daytime into night
But from the darkness true insight
The dark's our shadowed light

After winter comes the spring, and then in summer we begin
The fall of light, through autumn's glow and back to winter, so we know

We're going around in circles
Spinning natural cycles
We're going around in circles
So flow in nature's cycles
And just dance, dance, dance, dance

We're going around in circles
Spinning natural cycles
We're going around in circles
So flow in nature's cycles
And just dance, dance, dance, dance

We're going around in circles
Spinning natural cycles
We're going around in circles
So flow in nature's cycles
And just dance, dance, dance, dance
